

MUSTIQUE

**New Website Unveiled for the Island of Mustique
(St. Lucia)**

Press release - 2011-06-27

***Enhanced Features and
Navigation Allow for an
Interactive Experience***

The Mustique Company is pleased to announce the launch of its new website, which features a fresh design, in-depth villa profiles, and an interactive map that visually brings the Caribbean island to life.

Perusing the various villa options is now easier with the new comprehensive "Choosing a Villa" section, which divides up Mustique's 72 diverse villas into four groups: Classic,

Contemporary, Hilltop, and Beachfront. Each villa profile includes a floor plan, map location, private chef information, and photos, as well as the rates and list of amenities.

In addition, the website highlights the island's activities, easy island-to-island excursions, and the latest travel information, including a list of international airlines that fly directly to Barbados and St. Lucia, as well as Mustique flight connection schedules for The Mustique Company's Twin Otters planes. The "PR & Media" section includes the latest press features in a downloadable format.
